Working on the till and assisting customers

---

## Other Activities

I am a very keen photographer and spend a lot of my spare time experimenting with different styles and techniques. Recently I have started to take photographs at concerts (in connection with Outline magazine) and have received encouraging comments from many band members.

I have been a climber for several years and regularly use the UEA climbing wall. I am also involved in a local performance arts group known as the "BreakNecks". With this organisation I have performed, photographed, designed posters and leaflets, and programmed their website. An associate of this group then approached me with some graphics work which involved designing posters and leaflets for a puppet show. These designs were taken to Edinburgh and used in their advertising for the festival. Through these experiences I have become more self-confident and learned how to work with other people to produce successful outcomes. These experiences have also encouraged my proficiency in a variety of design-based software packages, for example, Photoshop, Illustrator, Flash, Dreamweaver and 3D Studio Max.

I enjoy web design and programming and have on several occasions volunteered my services to other people and organisations.

In 2005 I visited India with the Norwich School mainly as a sight-seeing tour. I then returned in the summer for a month during which I took part in community service work in Kashmir.

I believe that I am enthusiastic, hard working and able to use my initiative. I have had experience in dealing with members of the public and enjoy working as part of a team.
